

Matica Fintec: signed an important supply contract with one of the largest System Integrators worldwide

Milano, 04 May 2022

Matica Fintec S.p.A. (or “Matica”), an Innovative SME listed on the Euronext Growth Milan market, organized and managed by Borsa Italiana S.p.A., active in the design, production and marketing for Digital ID and payment solutions, announces the closing of an important supply contract **with one of the largest System Integrators worldwide, for a value of approximately €700.000.**

The order consists of two S7000Jet systems with DoD technology, used for issuance in the banking sector. The systems will be delivered, installed and made operational for production by the end of June 2022.

This is a new order of the recently launched system with innovative printing technology, which is enjoying great success in the market. The order follows the recent announcement of a contract with Thomas Greg, to supply two S700Jet systems with DoD technology ([see press release dated 22 February 2022](#)).

The client is a multinational company, with annual revenue of over € 2 billion, with a worldwide presence, active mainly in the Digital ID and Payment markets. For the client, the benefits linked to the adoption of the two systems with new DoD technology are multiple: this technology grants in fact significantly higher production speeds if compared to standard systems, offers a wide range of customization options for financial institutions, provides lower costs of consumables and lastly has few limitations regarding writing on different types of card materials.

This press release is available on the website www.maticafintec.com in the Investor Relations - Financial press releases section and on www.1info.it.

Matica Fintec

With operational headquarters in Galliate (NO) and registered office in Milan, Matica Fintec is an innovative SME active in the design, production and marketing of highly technological solutions for the issuance of digital cards for financial institutions (credit cards, debit cards and rechargeable) and Government (identity cards, passports, driving licenses, etc.) according to the highest safety standards.
