### Explanatory notes to the consolidated financial statements

#### **Foreword**

These consolidated financial statements at December 31, 2024 (hereinafter "Consolidated Financial Statements") were prepared in accordance with IAS 34, on the assumption that the company operates and is a going concern, applying the accounting standards set forth in IFRS issued by the International Accounting Standards Board ("IASB") and endorsed by the European Union. "IFRS" also means the International Accounting Standards ("IAS") still in force, as well as all the interpretations issued by the Interpretation Committee, formerly the International Financial Reporting Interpretations Committee ("IFRIC") and earlier the Standing Interpretations Committee ("SIC").

These consolidated financial statements were prepared pursuant to and for the purposes of Article 19 of the Euronext Growth Milan Regulation of Borsa Italiana S.p.A..

#### 1 Basis for presentation

These consolidated financial statements at December 31, 2024 consist of the Statement of Financial Position, Statement of Comprehensive Income, Statement of Cash Flows, Statement of Changes in Equity, Notes to the Financial Statements, and are also accompanied by the Directors' Report on Operations.

The figures of the Statement of Financial Position and Statement of Comprehensive Income contained in the Consolidated Financial Statements at December 31, 2024 are compared with the annual consolidated figures at December 31, 2023.

The format adopted for the statement of financial position includes the distinction between current and non-current assets and liabilities.

The items of profit/loss for the year are included directly in the statement of comprehensive income. The income statement format adopted envisages the classification of costs by nature.

The statement of changes in equity includes the amounts of any transactions with equity holders and changes during the year in reserves.

In the statement of cash flows, cash flows from operations are presented using the indirect method, whereby net profit or loss for the year is adjusted for the effects of non-cash transactions, any deferrals or accruals of prior or future operating cash receipts or payments, and items of income or expense related to cash flows from investing or financing activities.

The Statement of Financial Position, Statement of Comprehensive Income, and Statement of Changes in Equity are presented in units of Euro; amounts shown in the notes to the financial statements are in Euro thousands unless otherwise indicated.

#### 2 Consolidation scope

These Consolidated Financial Statements include the financial statements at December 31, 2024 of the companies/entities included in the consolidation scope (hereinafter "consolidated entities") prepared in accordance with IAS/IFRS accounting standards of the Group.

Subsidiaries are all those investees over which the Group concurrently has:

- decision-making power, namely, the ability to direct the relevant activities of the investee, i.e., those activities that have a significant influence on the results of the investee:
- entitlement to variable (positive or negative) results derived from the investment in the consolidated entity;
- ability to use its decision-making power to determine the amount of results derived from the investment in the consolidated entity.

The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control is assumed until the date on which such control ceases. The portions of equity and net result attributable to non-controlling interests are shown separately in the Consolidated Statement of Financial Position and Consolidated Income Statement, respectively.

Listed below are the entities included in the consolidation scope and the relating percentages of direct or indirect ownership by the Group.

Subsidiaries are consolidated on a line-by-line basis.

The following is a list of Matica Fintec S.p.A. (the "Parent Company") investments at December 31, 2024, unchanged versus December 31, 2023:

Amounts in Dollars					
Name	Date of incorporation	Registered office	Currency	Share capital	% held (dir. or indir.)
UbiQ Software Inc.	12/07/2004	5775 W.Old Shakopee Road, Suite 160, 55437 Bloomington MN (USA)	Dollar	2,758,877	100%

#### Consolidation methods

The main consolidation methods adopted are as follows:

- the carrying amount of the investments, included in the consolidation scope, is eliminated
  against the relevant equity, in connection with the assumption of assets and liabilities based
  on the global integration method; any difference arising from the above elimination, after
  being allocated, where possible, to the individual elements of assets and liabilities, is
  carried as an adjustment to the Group's equity and allocated to retained earnings (losses);
- receivables and payables, costs and revenue, any dividends received, and any other transactions between companies included in the consolidation scope are eliminated;
- the following criteria were adopted for the translation of financial statements expressed in foreign currencies into Euro, consistent with current regulations:
  - assets and liabilities are valued at the spot exchange rate at December 31, 2024;
  - income statement items are valued by applying the average exchange rate for the period;
  - reserves are stratified according to the exchange rate on the date they were formed.

Exchange rate differences arising from the translation of equity at historical exchange rates of formation as opposed to those in effect at the balance sheet date, including the difference arising from the income result expressed at the average exchange rate for the period, are charged directly to equity in a specific "Reserve from translation differences".

The exchange rates used for the financial statements of foreign subsidiaries in foreign currencies are as follows:

- euro/dollar daily exchange rate at December 31, 2024: 1.0389, for translation of Statement of Financial Position items;
- average annual euro/dollar rate (January-December 2024): 1.08205, for the translation of Income Statement items.

(Source Bank of Italy: https://www.bancaditalia.it/compiti/operazioni-cambi/)

With regard to information on the Group's business performance, the main events that occurred in 2024 and those that occurred after the closing date, reference is made to the Directors' Report on Operations accompanying these consolidated explanatory notes.

#### 3. Applied accounting standards

#### General standards of preparation

The consolidated financial statements were prepared on a going concern basis, with the presentation currency being the Euro, and amounts shown are rounded to the nearest unit, including, unless otherwise indicated, amounts presented in the notes.

Unless otherwise indicated, the accounting standards indicated in this section were also applied for the separate financial statements of Matica Fintec S.p.A..

The consolidated financial statements are prepared in accordance with IAS/IFRS issued by the IASB and published in the Official Journal of the European Community. The consolidated financial statements are prepared under the assumption of the Group's ability to operate as a going concern and include the group's financial position, income statement, statement of comprehensive income, and related notes.

The most significant accounting standards adopted in the preparation of these consolidated financial statements are:

#### **Business combinations**

Business combinations are accounted through the acquisition method. The cost of an acquisition is the acquisition-date fair value of the consideration transferred, plus the amount of any non-controlling interest held. For each business combination, any non-controlling interest in the acquiree must be measured by the acquirer at fair value or in proportion to the non-controlling interest's share of the acquiree's identifiable net assets. The acquisition costs are recognized and classified under administrative expense.

At the date of acquisition, the identifiable assets acquired and liabilities assumed are recognized at fair value at the date of acquisition; exceptions are deferred tax assets and liabilities, assets and liabilities for employee benefits, liabilities or equity instruments related to share-based payments of the acquiree or share-based payments issued in lieu of contracts of the acquiree, and assets (or groups of assets and liabilities) held for sale, which are instead measured according to their relevant principle.

Any contingent consideration must be recognized by the acquirer at fair value at the acquisition date and classified in accordance with IFRS 9.

Goodwill is initially measured at the cost that arises as the excess of the sum of the consideration transferred in the business combination, the value of equity attributable to non-controlling interests, and the fair value of any previously held investment in the acquiree over the fair value of the net assets acquired and liabilities assumed at the acquisition date. If the value of the net assets acquired and liabilities assumed at the date of acquisition exceeds the sum of the consideration transferred, the value of equity attributable to non-controlling interests, and the fair value of any previously held investment in the acquiree, this excess is recognized immediately in the income statement as income from the completed transaction.

Equity attributable to non-controlling can be measured at fair value or in proportion to the net assets recognized for the acquired company, at the acquisition date. The valuation method is selected on a case-by-case basis.

Any contingent consideration under the business combination agreement is measured at fair value at the acquisition date and included in the value of consideration transferred in the business combination for the purpose of determining goodwill. Any subsequent changes in this fair value, which qualify as adjustments arising in the measurement period, are included in goodwill retrospectively. Changes in fair value that qualify as adjustments that arose in the measurement period are those that result from more information about facts and circumstances that existed at the acquisition date, obtained during the measurement period (which cannot exceed a period of one year from the business combination).

In case of business combinations accomplished in subsequent steps, the investment previously held in the acquired company is subject to write-back at fair value from the date of control acquisition and any resulting income or loss is recognized in the income statement. Any amounts arising from the investment previously held and recognized in Other comprehensive income (loss) are reclassified in the income statement as if the investment had been sold.

If the initial amounts of a business combination are incomplete at the balance sheet date on which the business combination occurred, the provisional amounts of the items for which recognition cannot be completed are shown in the consolidated financial statements. These provisional amounts are adjusted in the measurement period to take account of any new information about facts and circumstances existing at the acquisition date, that, if made available earlier, would have had an impact on the value of the assets and liabilities recognized on that same date.

Transactions in which the controlling entity acquires or disposes of additional minority interests without changing the control exercised over the subsidiary are transactions with shareholders, and therefore their effects must be recognized in equity: there will be no adjustments to the value of goodwill and gains or losses recognized in the income statement.

Ancillary expense from business combination transactions is recognized in the income statement in the period in which it is incurred.

#### Intangible assets with finite useful life

Other intangible assets are recognized in the statement of financial position only if it is probable that the use of the asset will generate future economic benefits and if the cost of the asset can be measured reliably. When these conditions are met, intangible assets are recorded at their purchase cost, which corresponds to the price paid plus ancillary expense.

The gross carrying amount of other intangible fixed assets with finite useful life is systematically apportioned among the years in which their use occurs through allocation of constant amortization rates in relation to their estimated useful lives. Amortization starts when the asset is available for use. The amortization rates used are determined according to the useful life of the relevant assets.

Industrial patent rights and rights to use intellectual works are amortized on the basis of their presumed duration of use, however, not exceeding the duration set by license agreements. Development costs are amortized over the time frame in which the related economic benefits are expected to be used.

#### Other intangible fixed assets

Other intangible assets are recognized in the statement of financial position only if it is probable that the use of the asset will generate future economic benefits and if the cost of the asset can be measured reliably. When these conditions are met, intangible assets are recorded at their purchase cost, which corresponds to the price paid plus ancillary expense.

The gross carrying amount of other intangible fixed assets with finite useful life is systematically apportioned among the years in which their use occurs through allocation of constant amortization rates in relation to their estimated useful lives. Amortization starts when the asset is available for use and is proportionate, for the first year, to the period of actual use. The amortization rates used are determined according to the useful life of the relevant assets.

#### Intangible assets with indefinite useful life: Goodwill

Goodwill is recognized as an asset with indefinite useful life and is not amortized; rather, it is tested annually, or more frequently if there is an indication that specific events or changed circumstances may have resulted in impairment, for impairment. Impairment losses are recognized directly in profit and loss and are not subsequently reversed. After initial recognition, goodwill is measured net of any accumulated impairment losses.

In order to test for impairment, goodwill acquired in a business combination is allocated as of the acquisition date to the individual cash-generating units or groups of cash-generating units that are expected to benefit from the synergies of the combination, regardless of whether other assets or liabilities of the acquiree are assigned to those units or groupings of units.

Each unit or groups of units to which the goodwill is allocated:

- represents the lowest level at which goodwill is monitored for internal management purposes;
- is no broader than the segments identifiable by segment reporting.

Any impairment loss is identified by comparing the carrying amount of the cash-generating unit with its recoverable value. In the event that the recoverable amount from the cash-generating unit is less than the assigned book value, the corresponding impairment loss is recognized. Such an impairment loss is not reinstated in the event that the reasons that generated it cease to apply.

If goodwill has been allocated to a cash generating unit (CGU) and the entity disposes of part of this unit, goodwill associated with the sold unit must be included in the book value of the asset when the profit or loss on disposal is determined. Goodwill associated with the discontinued operation must be calculated on the basis of the relating values of the discontinued operation and the retained portion of the cash-generating unit.

Tangible fixed assets

They are recorded at the cost of acquisition or production, including directly attributable ancillary expense required to put the asset into operation for its intended use.

Cost is reduced by depreciation, except for land, which is not depreciated because it has indefinite useful life, and any impairment losses.

Depreciation is calculated line-by-line through percentages that reflect the economic and technical deterioration of the asset and is computed from the time the asset is available for use. Significant parts of tangible assets that have different useful lives are accounted for separately and depreciated on the basis of their useful lives.

Useful lives and residual amounts are reviewed annually at the balance sheet date. The useful lives used for the purpose of preparing these financial statements are as follows:

Leasehold improvements: shorter of useful life and lease contract

Plant and machinery: 10%

Industrial and commercial equipment: 15%

furniture and fittings: 12%

electronic office equipment: 20%

Charges incurred for ordinary maintenance and repairs are directly charged to the income statement for the year in which they are incurred.

Gains and losses arising from the sale or disposal of tangible assets are determined as the difference between the sale proceeds and the net carrying amount of the asset and are recognized in the income statement for the year.

Leasehold improvements having the characteristics of fixed assets are capitalized in the category of the asset to which they refer and are depreciated over their useful life or over the term of the lease, whichever is shorter.

Financial expense incurred for investments in assets that normally require a specific amount of time in order for the asset to be ready for use or sale (qualifying asset pursuant to IAS 23 - Borrowing costs) is capitalized and amortized over the useful life of the asset class to which it relates.

All the other financial expense is recognized in the income statement during the year in which it is incurred.

#### Investments

Investments in subsidiaries excluded from consolidation are carried at cost adjusted for impairment. Any excess in value between the purchase price at the time of acquisition and the share of equity at current values is therefore included in the carrying amount of the investment. Whenever there is evidence that such investments have incurred an impairment loss, the impairment loss is recognized in profit and loss. Should the share of losses in an investment exceed the carrying amount of the investment, and the entity is required to reflect those losses, the value of the investment is written off and the share of any such losses is shown as a provision in liabilities. Whenever an impairment loss is reduced or ceases to exist, the loss is reversed up to the carrying amount through profit and loss.

Associates are all those companies over which the Group is able to exercise significant influence as defined by IAS 28 - Investments in Associates and Joint Ventures. Such influence is normally presumed to exist where the Group holds between 20% and 50% of the voting rights, or in which - even with a lower proportion of voting rights - it has the power to participate in the determination of financial and management policies by virtue of special legal ties such as, for example, participation in shareholders' agreements jointly with other forms of significant exercise of governance rights.

#### **Impairment**

At least once a year, a test is conducted on whether the assets and/or cash generating units ("CGUs") to which the assets are attributable may be impaired. If there is such evidence, the recoverable value of assets/CGUs is estimated. Goodwill and other intangible assets with indefinite useful lives are tested for impairment annually or more frequently whenever there is an indication that the asset may be impaired.

Recoverable value is defined as the higher of its fair value less costs to sell and value in use. Value in use is defined on the basis of discounting the expected future cash flows from the use of the asset, before tax, by applying a discount rate that reflects current market changes in the time value of money and risks of the asset.

When the recoverable amount of an individual asset cannot be estimated, the recoverable amount of the cash-generating unit to which the asset belongs is estimated.

In the event that the recoverable amount of an asset (or cash-generating unit) is less than its carrying amount, the carrying amount is reduced to the recoverable amount and the loss is charged to the income statement. Thereafter, if a loss on assets other than goodwill ceases to apply or is reduced, the carrying amount of the asset (or cash-generating unit) is increased to the new estimate of recoverable amount (which in any case cannot exceed the net carrying

amount that the asset would have had if the impairment loss had never been incurred). This reinstatement is immediately recognized in the income statement.

#### Financial instruments

Financial instruments, if any, are included in the balance sheet items described below. Investments and other non-current financial assets include investments in subsidiaries, other non-current financial assets. Current financial assets include trade receivables and cash and cash equivalents. Specifically, cash and cash equivalents include bank deposits. Financial liabilities refer to financial payables, including payables for advances on orders, assignment of receivables, as well as other financial liabilities (which include the negative fair value of derivative financial instruments), trade payables, and other payables.

#### Non-current financial assets

Non-current financial assets other than investments, if any, as well as financial liabilities, are accounted for in accordance with IFRS 9.

This measurement category includes equity instruments for which the Group - at initial recognition or at transition - has exercised an irrevocable option to present gains and losses from changes in fair value in equity (FVOCI). They are classified as non-current assets under "Other financial assets at fair value through OCI".

They are initially recognized at fair value, including transaction costs directly attributable to the acquisition.

They are subsequently measured at fair value, and gains and losses from changes in fair value are recognized in a specific equity reserve. This reserve will not revert to the income statement. If the financial asset is sold, the amount suspended in equity is reclassified to retained earnings. Dividends from such financial assets are recognized in the income statement when the right to collect arises.

#### Receivables

Receivables are initially recorded at fair value, generally represented by the agreed consideration or the present value of the amount that will be collected. They are then measured at amortized cost, reduced in case of impairment. Amortized cost is calculated using the effective interest rate method, which is equivalent to the discount rate that, when applied to future cash flows, makes the present book value of those flows equal to the initial fair value. Receivables in currencies other than the functional currency of individual entities are adjusted to period-end exchange rates with a balancing entry in the Income Statement. Receivables are derecognized when the right to receive cash flows is settled, when substantially all the risks and rewards associated with holding the receivable have been transferred, or if the receivable is

deemed to be permanently irrecoverable after all necessary recovery procedures have been

completed. Concurrent to the write-off of the receivable, the related provision is also reversed, if the receivable was previously written down.

#### Write-down of receivables

For trade receivables, the Group applies a simplified approach, calculating expected losses over the life of the receivables from the time of initial recognition. The Group uses a matrix based on historical experience and linked to the ageing of the receivables, adjusted to account for forecasting factors specific to certain creditors.

For financial receivables, the calculation of impairment is made with regard to expected losses in the next 12 months. This calculation is based on a matrix that includes customer ratings provided by independent market participants. If there is a significant increase in credit risk after the origination date of the receivable, the expected loss is calculated with reference to the entire life of the receivable. The Group assumes that the credit risk on a financial instrument has not increased significantly since initial recognition if the financial instrument is determined to have low credit risk at the reporting date.

The Group assesses whether there has been a significant increase in credit risk when the customer's rating, assigned by independent market participants, undergoes a change that shows an increase in the probability of default.

The Group considers a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the full contractual amount past due (e.g., when receivables are at legal).

#### **Payables**

Payables are initially recorded at fair value, generally represented by the agreed consideration or the present value of the amount that will be paid. They are then measured at amortized cost. Amortized cost is calculated using the effective interest rate method, which is equivalent to the discount rate that, when applied to future cash flows, makes the present book value of those flows equal to the initial fair value. Payables in currencies other than the functional currency of individual entities are adjusted to year-end exchange rates with a balancing entry in the Income Statement.

#### Cash and cash equivalents

Cash and cash equivalents include cash, bank accounts, post office accounts, deposits on demand, and other short-term highly liquid financial investments which are easily convertible to cash and not subject to the risk of significant value changes.

#### Derivative financial instruments

Consistent with IFRS 9, derivative financial instruments, where they exist, may be accounted for in the manner established for hedge accounting only when, at the inception of the hedge,

there is formal designation and documentation of the hedging relationship itself, the hedge is expected to be highly effective, the effectiveness can be reliably measured, and the hedge itself is highly effective during the various periods for which it is designated.

All derivative financial instruments are measured at fair value.

If a derivative financial instrument is designated to hedge the exposure to the variability of the future cash flows of an asset or liability booked in the financial statements or a highly probable transaction that could impact on the income statement, the effective portion of the profits or losses on the derivative financial instrument is recognized in equity. The cumulative profit or loss is removed from equity and recorded in the income statement in the same period in which the relevant operating effect of the transaction subject of the hedge is recognized. The profit or loss associated with a hedge (or part of a hedge) which has become ineffective is immediately booked in the income statement. If a hedging instrument or hedging relationship is terminated, but the hedged transaction has not yet taken place, the cumulative gains and losses, up to that point recognized in equity, are recognized in the income statement in correlation with the recognition of the income effects of the hedged transaction. If the hedged transaction is no longer considered probable, the unrealized gains or losses suspended in equity are immediately recognized in the income statement.

Derivative instruments that cannot be accounted for using hedge accounting are initially recognized at cost, and adjusted to fair value at subsequent closing dates. Changes in fair value are recognized in the income statement.

#### Inventory

Inventory is recognized at the lower of purchase or production cost and realizable value represented by the amount the entity expects to obtain from their sale in the normal course of business. The cost configuration adopted is the weighted average cost. Purchase costs include prices paid to suppliers net of discounts and rebates.

Provisions are made against the value of inventory thus determined to account for inventory considered obsolete or slow-moving.

#### Assets and liabilities held for sale

Assets and liabilities held for sale and discontinued operations, if any, are classified as such if their carrying amount will be recovered primarily through sale rather than through continued use. These conditions are considered fulfilled when the sale or discontinuance of the disposal group of assets is considered highly probable and the assets and liabilities are immediately available for sale in their present condition.

When an entity is involved in a divestment plan involving the loss of control of an investee, all the assets and liabilities of that investee are classified as held for sale when the conditions described above are fulfilled, even if, after the divestment, the entity continues to hold a minority interest in the subsidiary.

Assets held for sale are measured at the lower of their net book value or fair value less costs to sell.

#### Employee benefits

Premiums paid under defined contribution plans are recognized in the income statement for the portion accrued during the year.

Until December 31, 2006, the provision for post-employment benefits (TFR) was considered a defined benefit plan. The regulations of this fund were amended by Law No. 296 of December 27, 2006 ("2007 Budget Law") and subsequent Decrees and Regulations issued in early 2007. In light of these changes, and in particular with regard to companies with at least 50 employees, this system is now to be considered a defined benefit plan exclusively for the portions accrued before January 1, 2007 (and not yet settled at the balance sheet date), while for the portions accrued after that date it is assimilated to a defined contribution plan.

Defined benefit pension plans, which include post-employment benefits due to employees under Article 2120 of the Civil Code, are based on employees' working lives and the remuneration received by the employee over a set period of service. Specifically, the liability representing the benefit due to employees under defined benefit plans is recorded in the balance sheet at its actuarial value.

The recognition of defined benefit plans in the financial statements requires the estimation by actuarial techniques of the amount of benefits accrued by employees in exchange for their service in the current and prior years and the discounting of these benefits to determine the present value of the entity's commitments. The calculation of the present value of commitments is made by an independent actuary using the Projected Unit Credit Method. This method treats each period of service performed by workers with the company as an additional unit of entitlement: the actuarial liability must therefore be quantified based on only the seniority accrued as of the valuation date; therefore, the total liability is usually re-proportioned according to the ratio of the years of service accrued as of the valuation date to the total seniority attained at the time the benefit is scheduled to be paid. Additionally, the above approach considers incorporating future salary increases, for whatever reason (inflation, career, contract renewals, etc.), up to the time of termination of employment.

The cost for defined-benefit plans accrued during the year and recognized in the income statement as part of personnel expense is equal to the sum of the average present value of the rights accrued by the employees present for work performed during the year, and the annual interest accrued on the present value of the entity's commitments at the beginning of the year, calculated using the discount rate for future outlays adopted to estimate the liability at the end of the prior year. The annual discount rate adopted for the computations is assumed to be equal to the market rate at the end of the period relating to zero coupon bonds with maturities equal to the average remaining life of the liability.

The amount of actuarial losses and gains, resulting from changes in the estimates made, is charged to the income statement.

#### Provisions for future risks and charges

These are allocations arising from current obligations (legal or implied) and relating to a past event, the fulfillment of which is likely to require the use of resources, the amount of which can be reliably estimated. If the expected use of resources extends beyond the subsequent year, the obligation is recorded at the present value determined by discounting the expected future cash flows discounted at a rate that also takes account of the cost of money and the risk of the liability.

Provisions are reviewed at each reporting date and adjusted, if necessary, to reflect the current best estimate; any changes in estimates are reflected in the income statement for the period in which the change occurred.

Risks for which the onset of a liability is merely a possibility are disclosed in the notes to the financial statements without making any provisions.

#### Product sales

Revenue from product sales is recognized when performance obligations to customers are met. Performance obligations are met when control of the asset is transferred to the customer.

Retrospective discounts based on the achievement of targets, where envisaged in commercial agreements, are applied to product sales. Revenue from sales is recognized net of such discounts, estimated on the basis of historical experience using the expected value method and for amounts that are not expected to be reversed.

Sales do not include a financial component, as the average payment terms applied to customers are within standard commercial terms for the relevant country.

#### Provision of services

Revenue from services is recognized when the service rendered is completed.

#### Financial income and expense

Financial income and expense is recognized on an accrual basis.

#### Government grants

The recording of government grants is contingent upon a reasonable assurance that they will be received, which typically coincides with the formal resolution of the public granting bodies, and upon the satisfaction of all the conditions for obtaining the grants. They are accounted for differently according to the nature of the grant, specifically:

- where grants are intended to cover costs (e.g., relief or plant grants), they should be accounted for in the same way as the related costs, i.e., in the income statement, and

- over the time horizon over which the costs accrue (e.g., over the time horizon of depreciation of the asset for which the plant grant was received);
- if the grants have financing substance and represent an incentive provided by a public entity without the related costs being incurred, the grant should be accounted for in equity.

#### Tax

Tax for the year corresponds to the sum of current and deferred tax.

Current tax is based upon taxable income for the year. Taxable income differs from the results shown in the income statement as it excludes both positive and negative entries which would be taxable or deductible in other tax years and excludes items which are not taxable or deductible at any time. The liability for current tax is calculated using the rates in effect or in fact in effect at the balance sheet date, or if known, those that will be in effect when the asset is realized or the liability settled.

Deferred tax assets and liabilities are the tax expected to be paid or recovered on temporary differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax amount used in calculating taxable income, accounted for using the global liability allocation method. Deferred tax liabilities are generally recognized for all taxable temporary differences, while deferred tax assets are recognized to the extent of the probability that there will be future taxable profits which will allow for the utilization of the deductible temporary differences. These assets and liabilities are not recognized if the temporary differences arise from goodwill or from the initial recognition (not in business combinations) of other assets or liabilities in transactions that have no influence on either profit for accounting purposes or taxable profit. The tax benefit from the carryforward of tax losses is recognized when and to the extent that it is deemed probable that future taxable income will be available against which such losses can be used.

The book value of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that there will be sufficient taxable income to allow all or part of these assets to be recovered.

Deferred tax is calculated at the tax rate expected to be in force at the time the asset is sold or the liability is settled.

Deferred tax is charged directly to the income statement, except for tax related to items recognized directly in equity, in which case the related deferred tax is also charged to equity.

#### Estimation of fair value

The fair value of financial instruments listed in an active market, if any, is determined on the basis of market prices on the balance sheet date. The reference market price for financial assets held is the current sale price (purchase price for financial liabilities).

The fair value of financial instruments that are not traded in an active market is determined through various valuation techniques and assumptions based on market conditions existing at the balance sheet date. For medium- and long-term liabilities, prices of similar listed financial instruments are compared; for other categories of financial instruments, cash flows are discounted.

The fair value of IRS is determined by discounting the estimated cash flows from it to the balance sheet date. For receivables, it is assumed that the face value net of any adjustments made to account for their collectability approximates fair value. The fair value of financial liabilities for disclosure purposes is determined by discounting contract cash flows at an interest rate that approximates the market rate at which the entity finances itself.

#### 4 Measurement of fair value

With regard to financial instruments measured at fair value, the following is the classification of these instruments based on the hierarchy of levels under IFRS 13, reflecting the significance of the inputs used in determining fair value. The levels are as follows:

Level 1 - unadjusted quoted prices in active markets for assets or liabilities subject to measurement;

Level 2 - inputs other than the quoted prices mentioned above, which are observable on the market, either directly (as in the case of prices) or indirectly (i.e., as derived from prices); Level 3 - inputs that are not based on observable market data.

At December 31, 2024, no assets or liabilities held by the Group are measured at fair value.

#### 5 Risks to which the Group is exposed

The Group is mainly exposed to financial risk, market risk, credit risk, and liquidity risk.

#### 5.1 Financial risks

#### Risks arising from changes in exchange rates

Exchange risk is the risk that the value of a financial asset or liability will vary due to changes in exchange rates.

With regard to this risk, the strategy adopted aims at minimizing the impact on the income statement of changes in exchange rates and provides for hedging the risk arising from financial positions denominated in currencies other than the balance sheet currency if the need arises.

Based on the above, exchange rate fluctuations that occurred during the year did not have a material effect on the financial statements.

#### Risks arising from changes in interest rates

Financial debt is mostly governed by floating interest rates. However, the trend of interest rates is monitored by the Company, and in relation to their trend, the appropriateness of interest rate risk hedging may be considered. Currently, the Group does not hedge, taking account of the positive impact from current accounts receivable.

Details of financial assets and liabilities by category are shown below:

Amounts in Euro

-					
Financial assets at December 31, 2024	Financial instruments at fair value through profit or loss	Financial instruments at fair value through equity	Receivables and loans	Cash	Carrying amount
Financial assets:					
Financial receivables (portion within 12 months)	-	-	424,715		424,715
Financial receivables (portion over 12 months)			3,196,406		3,196,406
Receivables:					
Trade receivables from customers	-	-	7,259,038		7,259,038
Other current receivables/assets:					
Sundry receivables and assets	-	-	429,246		429,246
Other non-current assets			119,463		119,463
Cash and cash equivalents					
Bank and postal deposits	-	-	0	4,466,511	4,466,511
TOTAL FINANCIAL ASSETS	-	-	11,428,869	4,466,511	15,775,916

	IFRS 9 CATEGORIES					
Financial liabilities at December 31, 2024	Liabilities at amortized cost	Financial instruments at fair value through profit or loss	Financial instruments at fair value through equity	Carrying amount		
Payables and non-current financial liabilities:						
Payables to banks	3,839,769	-	-	3,839,769		
Other financial liabilities	15,185	-	-	15,185		
Non-current tax payables	17,329			17,329		
Current liabilities:						
Payables to banks and other lenders	3,492,245	-	-	3,492,245		
Payables to suppliers	1,589,004	-	-	1,589,004		
Other financial liabilities	1,983,834	-	-	1,983,834		
Other financial liabilities:	-	-	-	-		

#### 5.2 Market risk

#### **Exchange risk**

Exposure to the risk of changes in exchange rates arises from conducting business in currencies other than the Euro. The Group carries on its business primarily in Euro; therefore, this risk should be considered negligible.

#### Interest rate risk

The Group is partly exposed to the risk of rate fluctuations on its financial assets, short-term bank debts and loans, and long-term leases.

The Group's strategy aims at minimizing risk through a balanced allocation between fixed- and floating-rate loans, including ad hoc hedging instruments if the need arises.

Based on the above, interest rate fluctuations that occurred during the year did not have a material effect on the financial statements.

#### Price risk

Price risk is the possibility that the value of a financial asset or liability will vary as a result of changes in market prices (other than those related to currencies and rates).

This risk is typical of financial assets that are not listed in an active market and which cannot always be realized quickly at close to their fair value.

This risk, given the size of the outstanding investments, is not material and is therefore not hedged.

#### 5.3 Credit risk

Credit risk is the possibility that the issuer of a financial instrument will default on its obligation and cause a financial loss to the subscriber.

Credit risk arises from sales made in the ordinary course of business and from the use of financial instruments involving the settlement of positions with the counterparty.

With regard to trade transactions, the Group operates with medium- and large-sized counterparties in relation to which creditworthiness audits are carried out in advance.

The Group implements a procedure for evaluating and controlling its customer portfolio, including through constant monitoring of collections. In case of excessive or repeated delays, supplies are suspended.

Historically recorded losses on receivables are extremely low in relation to sales and do not require special hedging and/or insurance.

As for financial transactions, these are carried out with primary, large-sized financial institutions with high creditworthiness, whose rating is monitored for the purpose of limiting the risk of counterparty default.

#### 5.4 Liquidity risk

Liquidity risk can arise with the inability to raise, under economic conditions, the financial resources required for the Group's operations.

The Group finances its activities both through cash flows generated by operations and through resort to loan capital, and is therefore exposed to liquidity risk, represented by the fact that financial resources are not sufficient to meet financial and commercial obligations on the set terms and deadlines. The Group's cash flows, financing requirements, and liquidity are controlled by considering the maturity of financial assets (trade receivables and other financial assets) and the expected cash flows from related transactions. The Group has both secured and unsecured lines of credit, consisting of cancellable short-term lines in the forms of hot loans, overdrafts and signature credit.

The Group has a long-term debt structure exposed to interest rate risk as shown in Note 17 below.

Regarding exposure from trade payables, there is no significant supplier concentration.

Management believes that the funds generated from operations and financing activities will enable the Group to meet its needs arising from investing activities, working capital management, and repayment of debts as they mature contractually.

# 6.1 Accounting standards and interpretations endorsed and effective as of January 1, 2024

Pursuant to IAS 8 "Accounting Standards, Changes in Accounting Estimates, and Errors", the IFRSs that came into effect as of January 1, 2024, are shown below:

 Amendments to IAS 1 - Presentation of Financial Statements - Classification of Liabilities as current or non-current

The amendments clarify the criteria to be applied in classifying liabilities as current or non-current and specify that the classification of a liability is not affected by the likelihood that settlement of the liability will be delayed by twelve months following the reporting period. The Group's intention to liquidate the liability in the short term has no impact on classification.

These amendments had no impact on the disclosures provided on the accounting standards applied to the Group's consolidated financial statements.

 Amendments to IAS 1 - Presentation of Financial Statements - non-current liabilities with covenants

These amendments specify that covenants to be met after the reporting date do not affect the classification of debt as current or non-current at the reporting date. Instead, the amendments require the Company to provide information on these covenants in the notes to the financial statements.

These amendments had no impact on the disclosures provided on the accounting standards applied to the Group's consolidated financial statements.

Amendments to IFRS 16 - Leases: Liabilities for leases in a sale and leaseback transaction
 These amendments specify the requirements for accounting for a sale and leaseback after the transaction date.

Specifically, in the subsequent measurement of the liability arising from the lease agreement, the seller-lessee determines "lease payments" and "revised lease payments" in such a way as not to recognize gains or losses that relate to the retained right of use.

These amendments had no impact on the disclosures provided on the accounting standards applied to the Group's consolidated financial statements.

Amendments to IAS 7 - Statement of Cash Flows and to IFRS 7 - Financial Instruments:
 Disclosures - Supplier Finance arrangements

These amendments introduce new disclosure requirements to improve the transparency of information provided regarding supplier finance arrangements, especially regarding the effects of such arrangements on the entity's liabilities, cash flows and exposure to liquidity risk.

These amendments had no impact on the disclosures provided on the accounting standards applied to the Group's consolidated financial statements.

# 6.2 International accounting standards and/or interpretations issued but not yet effective and/or not endorsed

Under IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors", new Standards or Interpretations that have already been issued, but have not yet come into force or have not yet been endorsed by the European Union at December 31, 2024, and are therefore not applicable, and the foreseeable impact on the Consolidated Financial Statements, are shown below.

None of these Standards and Interpretations have been adopted by the Group in advance.

• Amendments to IAS 21 - The effects of changes in exchange rates: lack of exchangeability These amendments clarify when a currency is exchangeable for another currency and, consequently, when it is not. When one currency is not exchangeable for another, these

amendments define how the exchange rate should be determined. The amendments also specify the disclosures to be made when a currency is not exchangeable.

These amendments, which will come into force on January 1, 2025, have not been endorsed yet by the European Union. The Group is assessing whether the definition of lack of exchangeability is applicable to the currencies of the subsidiaries included in the consolidation scope.

#### IFRS 18 Presentation and Disclosure in Financial Statements

The new standard introduces three sets of new requirements to improve the reporting of companies' financial performance and provide investors with a better basis for analyzing and comparing companies: improved comparability in the income statement, greater transparency of management-defined performance measures, and more useful grouping of information in the financial statements. IFRS 18 supersedes IAS 1 Presentation of Financial Statements, was issued on April 9, 2024, and will be effective for annual periods beginning on or after January 1, 2027; early application is permitted. Assessments are ongoing on any impact on financial reporting.

- IFRS 19 Subsidiaries without public accountability: Disclosures (issued on May 9, 2024);
- The new standard refers to subsidiaries of entities that prepare IFRS-compliant consolidated financial statements; these entities, according to certain requirements, will be able, as part of their individual financial statements, to provide reduced disclosures that are better suited to the needs of users of their financial statements. IFRS 19 Subsidiaries without public accountability: Disclosures was issued on May 9, 2024 and has not been endorsed yet. No impact on the group consolidated financial statements is expected from the adoption of this standard.
- Amendments to IFRS 9 and IFRS 7 changes to classification and measurement of financial instruments

The proposed amendments are related:

- to the settlement of financial liabilities using an electronic payment system;
- to the assessment of contractual cash flow characteristics of financial assets, including those with environmental, social and governance (ESG) characteristics.

The document also proposes amendments or additions to the disclosure requirements for:

- investments in equity instruments designated at fair value through other comprehensive income;
- financial instruments with contractual terms that could change the timing or amount of contractual cash flows based on the occurrence (or non-occurrence) of a contingent event.

Amendments to IFRS 9 and IFRS 7 were issued on May 30, 2024 and have not been endorsed yet.

#### **EXPLANATORY NOTES**

#### 7. Tangible fixed assets

"Tangible fixed assets" at December 31, 2024 amounted to €410 thousand (€463 thousand at December 31, 2023). Changes in tangible fixed assets in the period are shown below:

Amounts in Euro thousands	Plant and machinery	Furniture and equipment	Vehicles	Leasehold improvements	Other property, plant and machinery	Total
Amounts at 31.12.2023	135	39	127	36	126	463
Changes in the year:						
- Foreign exchange difference	3	-	-	-	-	3
- Acquisitions in the year	1	12	65	15	50	143
- disposals	-	-	(31)	-	-	(31)
- depreciation	(51)	(19)	(55)	(8)	(65)	(199)
- utilizations	-	0	31	-	-	31
Amounts at 31.12.2024	87	33	136	43	111	410

During the year, there were no events that required a reassessment of the estimated useful lives of tangible fixed assets. At the end of the reporting period, the Group has determined that there are no indications that the tangible fixed assets recorded in the assets may have been impaired and, consequently, has deemed these amounts to be fully recoverable.

Tangible fixed assets include amounts accounted for in accordance with IFRS 16 - Leases with a net book value at December 31, 2024 of €147 thousand (€143 thousand at December 31, 2023).

#### 8 Intangible fixed assets

"Intangible fixed assets" at December 31, 2024 amounted to €7,714 thousand (€7,282 thousand at December 31, 2023). Changes in intangible fixed assets in the period are shown below:

Amounts in Euro thousands	Development costs	Patents, Trademarks and other rights	Software	Other intangible assets	Goodwill	Total
Amounts at 31.12.2023	3,771	56	3	1,962	1,490	7,282
Changes in the year:	-	-	_	-	-	-
- Acquisitions in the year	1,087	52	1	(2)	-	1,138
- disposals	-	-	-	(72)	-	(72)
- amortization	(436)	(32)	(4)	(2)	-	(473)
- utilizations	-	-	-	41	-	41
- entries on customer relationships identified upon PPA	-	-	-	(201)	-	(201)
Amounts at 31.12.2024	4,422	76	0	1,726	1,490	7,714

"Goodwill", amounting to €1,490 thousand, includes both the goodwill of Matica Fintec S.p.A., which arose in 2017 following transfer of the Matica Technologies Italian BU to Matica Fintec S.r.I. (formerly Matica Electronics S.r.I.), amounting to €1,100 thousand, and the goodwill generated as a result of the write-off of the Parent Company's investment in Card Technologies Corp. amounting to €390 thousand.

#### 9 Other non-current assets

"Other non-current assets" at December 31, 2024 amounted to €119 thousand (€834 thousand at December 31, 2023) and consisted solely of security deposits.

The long-term portion of loans granted by the Parent Company Matica Fintec to the controlling entity Matica Technologies Group SA, amounting to €2,792 thousand at December 31, 2024, and €717 thousand at December 31, 2023, was reclassified to financial receivables starting from these financial statements to better reflect the actual nature of the receivable.

#### 10 Deferred tax assets

"Deferred tax assets" at December 31, 2024 amounted to €209 thousand (€37 thousand at December 31, 2023). The amount refers entirely to the subsidiary for tax receivables related to loss carry-forwards.

Description	Taxable	Rate	31/12/24
Unrealized exchange losses	-	24.00%	-
Loss carry forward	5,550	21.00%	209
IAS-19 differences	-	24.00%	-
Total			209

Tax assets at December 31, 2023 were recorded in connection with the following temporary differences:

Description	Taxable	Rate	31/12/23
Unrealized exchange losses	38	24.00%	9
Write-down of receivables deductible in future years	15	24.00%	4
Write-down of receivables deductible in future years	100	24.00%	24
Total			37

Deferred tax assets are recognized on the assumption of their recoverability based on the probability of future taxable income.

#### 11 Inventory

"Inventory" at December 31, 2024 amounted to €4,608 thousand (€4,920 thousand at December 31, 2023). Assets are recognized in inventory when the transfer of risks and rewards associated with the acquired assets takes place. Specifically, the item includes raw materials, goods and work in progress, as detailed below:

#### Amounts in Euro thousands

	31/12/24	31/12/23
Raw and ancillary materials and consumables	2,603	2,614
Goods	2,017	2,759
Work in progress	211	187
Advances	-	0
Provision for inventory write-down	(222)	(641)
Total	4,608	4,920

#### 12 Tax receivables

"Tax receivables" at December 31, 2024 amounted to €216 thousand (€535 thousand at December 31, 2023). Tax receivables consist of €127 thousand in tax receivables for R&D and technological innovation. These receivables refer exclusively to the Parent Company.

/ Industrial in Edit of Graduatide	31/12/24	31/12/23
R&D tax receivable	127	140
Withholdings	89	21
VAT	-	-
Energy and gas receivable	-	-
IRES	-	329
IRAP	-	45
Total	216	535

#### 13 Trade and other receivables

"Trade and other receivables" at December 31, 2024 amounted to €7,259 thousand (€4,538 thousand at December 31, 2023). The increase is due to certain changes in payment terms. The composition of trade and other receivables at December 31, 2024 is as follows:

#### Amounts in Euro thousands

	31/12/24	31/12/23
Non-controlling interests	5,237	3,260
Related parties	2,038	1,326
Provision for bad debts	(16)	(48)
Total	7,259	4,538

#### 14 Cash and cash equivalents

"Cash and cash equivalents" at December 31, 2024 amounted to €4,467 thousand (€11,312 thousand at December 31, 2023). The Parent Company began repaying loans for the principal portion (prior to 2024, the portions were only pre-amortization), resulting in a reduction in cash, due also in part to an increase in working capital, both circumstances occurring mainly in the second half of the year. The composition at December 31, 2024 is as follows:

#### Amounts in Euro thousands

	31/12/24	31/12/23
Cash and cash on hand	3	1
Bank deposits	4,464	11,311
Total	4,467	11,312

Cash and cash equivalents are held with leading bank counterparties at interest rates aligned with prevailing market conditions.

#### 15 Other assets

"Other current assets" at December 31, 2024 amounted to €278 thousand (€289 thousand at December 31, 2023). They consist, as far as the Parent Company is concerned, mainly of prepaid expense calculated in connection with consulting (€82 thousand), insurance (€61 thousand), utilities (€26 thousand), other prepaid expense (€28 thousand) and advances to suppliers (€46 thousand), as well as costs for services incurred and deferred by the consolidated company UbiQ Software Inc (€32 thousand) and a residual part of "accrued income" (€2 thousand).

#### 16 Financial receivables

"Financial receivables" at December 31, 2024 amounted to €3,621 thousand (based on the new reclassification at December 31, 2023, they would have amounted to €907 thousand) and consisted of the following: €3,217 thousand for the receivable that the Parent Company has from the controlling entity Matica Technologies Group SA, which was increased during the year by €2,500 thousand for the granting of a new loan, and €404 thousand for UbiQ's receivable from Matica Technologies Group SA..

#### Amounts in Euro thousands

Timedine in Edio thededine	Non-current	Current	31/12/24	31/12/23
Loan vs MT GROUP SA	3,196	425	3,621	907
Total	3,196	425	3,621	907

#### 17 Equity

"Equity" at December 31, 2024 stood at €17,428 thousand (€14,514 thousand at December 31, 2023).

The composition of Group Equity is shown below:

	31/12/24	31/12/23
Share capital	5,479	5,479
Legal reserve	299	199
Share premium reserve	5,034	5,034
Consolidation reserve	124	127
Reserve from translation difference	(71)	(228)
Contribution reserve	16	16
Reserve for listing costs IAS 32	(938)	(938)
Reserve for capital contribution	177	177
IAS 19 Reserve	(110)	(98)
Reserve for shares held	(44)	(44)
Retained earnings (losses carried forward)	4,690	2,592
Profit (loss) for the year	2,772	2,197

Total Equity 17,428 14,514

The share capital consists of 10,957,962 ordinary shares with a unit book value of €0.50 per share.

The consolidation reserve originates as the difference between the value of newly-issued shares to service the acquisition of Card Technologies Corp (later UbiQ Software Inc. following the merger with the subsidiary NBS) and the average carrying price of the shares in the portfolio sold in order to complete the acquisition.

The share premium reserve is mainly determined by the premium paid at the time of listing for a total of €4,245 thousand and the increase in 2022 related to the two above transactions for a total of €778 thousand.

The IAS 19 reserve includes accumulated actuarial losses, recorded with a direct offset in equity under IAS 19, determined in relation to post-employment benefits. The negative reserve is determined net of deferred taxation.

At December 31, 2024, Matica Fintec S.p.A. held 19,800 treasury shares. Under IAS 31, the purchase cost of these shares was recorded in a negative reserve.

The following is a reconciliation of equity and profit for the period of the Parent Company and consolidated equity and profit for the period attributable to the Group:

It should be noted that the item "Other changes" is attributable to the translation reserve.

#### 18 Financial payables

"Financial payables" at December 31, 2024 totaled €7,332 thousand (€10,002 thousand at December 31, 2023). Financial payables are composed as follows and refer exclusively to the Matica Fintec S.p.A. entity, being the only Group company with financial payables:

#### Amounts in Euro thousands

	Non-current	Current	31/12/24	31/12/23
Payables to banks	(3,752)	(3,433)	(7,185)	(9,855)
Lease liabilities IFRS 16	(87)	(60)	(147)	(146)
Total	(3,840)	(3,492)	(7,332)	(10,002)

Financial payables at December 31, 2023 were composed as follows:

	Non-current	Current	31/12/23
Payables to banks	(6,485)	(3,370)	(9,855)
Lease liabilities IFRS 16	(92)	(54)	(146)
Total	(6,577)	(3,425)	(10,002)

Details of outstanding loans are as follows:

Bank	Amount of	Term		Interest rate	Outstand	ling debt at 31/12/2024	
Бапк	loan	Start	End	interest rate	Current	Non-current	Total
Banca del Fucino	1,000	24/05/2021	31/03/2027	Floating rate	200	250	450
Valsabbina	1,000	31/12/2019	31/10/2026	2.25% fixed annual nominal	210	183	393
Banca Finnat (Basket Bond)	4,000	21/10/2021	21/10/2028	Floating rate	647	1,992	2,639
Banca Intesa (Cash Overdraft - Finimport/export)	1,250	30/12/2020		Floating rate	700	-	700
Sace Simest	700	30/12/2020	31/12/2026	0.65% fixed annual nominal	167	171	338
Banca Intesa	4,500	15/09/2020	15/09/2026	Floating rate	1,509	1,156	2,665
Total loans/banks	12,450				3,433	3,752	7,185

The SACE SIMEST loan obtained in 2020 intended for the capitalization of exporting companies, consisted of the granting of a maximum of €800 thousand, of which €100 thousand non-repayable and the remainder at a subsidized rate of 0.65%; this loan was discounted at a market rate and the discounting component (€78 thousand) was accounted for in an equity reserve along with the non-repayable portion.

In October 2021, the issuance was completed, as part of a broader structured financing transaction in the form of a so-called "basket bond", of a non-convertible bond, pursuant to Article 2410 of the Civil Code, for a nominal amount of €4 million and a term of 7 years, which was underwritten by a securitization vehicle, established pursuant to Law No. 130 of April 30, 1999, which in turn financed itself by issuing asset-backed securities aimed at major qualified investors.

In May 2021, the Parent Company obtained a loan from Banca del Fucino totaling €1 million and maturing in 2027.

#### 19 Provision for other employee benefits

#### Defined contribution plans

In the case of defined contribution plans, the Group makes contributions to public or private insurance institutions based on of a legal or contractual obligation, or on a voluntary basis. By paying contributions, the Group fulfills all its obligations.

Contributions payable at the balance sheet date are included under "Other current liabilities"; the cost for the period accrues on the basis of the service rendered by the employee and is recognized under "Personnel expense" in the relevant area.

#### Defined benefit plans

Employee benefit plans, which can be regarded as defined benefit plans, are represented by post-employment benefits (TFR); instead, the liability is determined on an actuarial basis using

the "projected unit credit" method. Actuarial gains and losses determined in the calculation of these items are shown in a specific equity reserve.

"Provisions for other employee benefits" at December 31, 2024 amounted to €388 thousand (€334 thousand at December 31, 2023) and consisted of the following:

#### Amounts in Euro thousands

	31/12/24	31/12/23
Provision for post-employment benefits	(420)	(369)
Post-employment benefit reserve IAS19 adjustment	37	34
Treasury provision for post-employment benefits	(6)	-
Total	(388)	(334)

"Provision for employee benefit costs" and "Contribution/benefits paid" are recorded in the income statement under "Personnel expense" in the relevant area. "Financial expense/(income)" is recognized in the income statement under "Financial income (expense)", while the "actuarial gain/(loss)" component is shown in an Equity Reserve called "Actuarial gain/loss reserve".

#### 20 Deferred tax liabilities and tax provisions

Deferred tax liabilities at December 31, 2024 are recorded in connection with the following temporary differences and are attributable exclusively to the Parent Company:

#### Amounts in Euro thousands

Description	Taxable	Rate	31/12/24
Unrealized exchange gains	-	24.00%	-
Post-employment benefits	31	24.00%	7
Deferred tax on customer relationships identified upon PPA	504	21.00%	106
Total			113

Deferred tax liabilities at December 31, 2023 are recorded in connection with the following temporary differences:

Description	Taxable	Rate	31/12/23
Unrealized exchange gains	59	24.00%	14
Post-employment benefits	26	24.00%	6
Deferred tax on customer relationships identified upon PPA	705	21.00%	148

Total 168

#### 21 Tax payables

Current and non-current "Tax payables" at December 31, 2024 totaled €614 thousand (€347 thousand at December 31, 2023).

Current and non-current tax payables are composed as follows:

#### Amounts in Euro thousands

	Non-current	Current	31/12/24	31/12/23
IRES	-	(224)	(224)	-
IRAP	-	(8)	(8)	-
Withholdings	(17)	(362)	(379)	(267)
VAT	-	(2)	(2)	(80)
Total	(17)	(596)	(614)	(347)

Tax payables at December 31, 2023 were as follows:

#### Amounts in Euro thousands

	Non-current	Current	31/12/23
IRES	-	-	-
IRAP	-	-	-
Withholdings	(52)	(215)	(267)
VAT	-	(80)	(80)
Total	(52)	(295)	(347)

#### 22 Other liabilities

Current and non-current "Other liabilities" at December 31, 2024 amounted to €1,437 thousand (€2,318 thousand at December 31, 2023) and consisted of the following:

	Non-current	Current	31/12/24	31/12/23
Payables to employees	-	(503)	(503)	(492)
Payables to social security institutions	-	(177)	(177)	(209)
Advances	-	(144)	(144)	(420)
Payables to directors	-	(74)	(74)	(122)
Accrued expense and deferred income	-	(87)	(87)	(501)
Other payables	(15)	(438)	(453)	(574)

Total (15) (1,422) (1,437) (2,318)

Other liabilities at December 31, 2023 were composed as follows:

#### Amounts in Euro thousands

	Non-current	Current	31/12/23
Payables to employees	-	(492)	(492)
Payables to social security institutions	-	(209)	(209)
Advances	-	(420)	(420)
Payables to directors	-	(122)	(122)
Accrued expense and deferred income	-	(501)	(501)
Other payables	(16)	(558)	(574)
Total	(16)	(2,302)	(2,318)

#### 23 Trade and other payables

"Trade and other payables" at December 31, 2024 amounted to €1,589 thousand (€2,529 thousand at December 31, 2023).

The item is broken down as follows:

#### Amounts in Euro thousands

Total	(1,589)	(2,529)
Subsidiaries	-	-
Affiliates	20	(7)
Parents	-	(103)
Non-controlling interests	(1,609)	(2,419)
	31/12/24	31/12/23

The item includes the balance of payables to suppliers net of credit notes receivable and trade discounts.

#### 24 Revenue from sales and other income

"Revenue from sales" at December 31, 2024 amounted to €21,289 thousand (€22,590 thousand at December 31, 2023) and is shown net of returns, discounts and rebates.

Revenue from sales is made up as follows:

	31/12/24	31/12/23
Provision of services	3,278	2,289
Disposal of machinery	12,458	14,077
Disposal of consumables	2,193	2,782

Total	21,289	22,590
Other	(82)	9
Disposal of spare parts	3,442	3,433

The breakdown of revenue by geographical area at December 31, 2024 and at December 31, 2023 is as follows:

#### Amounts in Euro thousands

	31/12/24	31/12/23
Europe	4,288	4,912
Asia	4,510	3,051
South America	4,664	4,404
USA	1,181	2,310
Africa	2,454	2,017
United Arab Emirates	-	1,824
Other Middle East	3,490	1,211
EMEA	24	668
Italy	565	722
India	161	1,400
Canada	4	-
Australia	-	21
China	102	52
Total	21,289	22,591

Other revenue and income, amounting to €146 thousand at December 31, 2024 (€287 thousand at December 31, 2023), include mainly €117 thousand from the tax receivable for research development and innovation, €28 thousand from contingent assets related mostly to settlement of items with suppliers, and €14 thousand from reimbursements for claims incurred.

#### 25 Purchase costs

"Purchase costs" at December 31, 2024 amounted to €7,609 thousand (€8,080 thousand at December 31, 2023).

They include purchases of goods and finished goods and are shown net of discounts and rebates. The detail is shown in the table below:

	31/12/24	31/12/23
Purchases of finished products and goods	7,461	7,796
Subcontracted work	148	179
Other	0	105

Total 7,609 8,080

#### 26. Other operating costs

"Other operating costs" at December 31, 2024 amounted to €5,093 thousand (€5,926 thousand at December 31, 2023).

They include costs for services, lease and rental costs, and sundry operating expense as detailed below:

#### Amounts in Euro thousands

	31/12/24	31/12/23
Service costs	4,341	5,057
Rentals and leases	501	467
Sundry operating expense	250	401
Total	5,093	5,926

The Group's service costs are detailed in the table below:

#### Amounts in Euro thousands

	31/12/24	31/12/23
Consultancy	1,597	1,591
Royalties	532	513
Fees to Directors and Statutory Auditors	1,126	1,149
Advertising and marketing	88	338
Travel expense	105	77
Transportation and customs costs	207	321
Insurance	70	62
Entertainment expense	20	36
IT expense	215	89
Motor vehicle expense	72	60
Utilities	46	63
Maintenance	30	27
Certifications	27	11
Other administrative expense	209	129
Other general expense	(3)	377
Fees	<u></u>	214
Total	4,341	5,057

Lease and rental costs, amounting to €501 thousand, mainly relate to office buildings located in Galliate, where the Company transferred its operational offices in 2017; the lease agreement does not fall within the scope of IFRS 16 - Leases.

Sundry operating expense of €250 thousand mainly includes contingent liabilities (€147 thousand), expense for deposits and publication of financial statements and minutes of meetings (€44 thousand), loan losses (€23 thousand), tax and fees (€15 thousand), membership fees (€10 thousand), penalties (€4 thousand) and various other costs such as rounding up, gifts and donations (€7 thousand).

#### 27 Personnel expense

"Personnel expense" at December 31, 2024 amounted to €5,129 thousand (€5,041 thousand at December 31, 2023).

The item is broken down as follows:

Amounts in Euro thousands

	31/12/24	31/12/23
Wages and salaries	3,221	3,289
Social security expense	681	672
Post-employment benefits	80	67
Retirement benefits and the like	67	73
Other costs	1,080	940
Total	5,129	5,041

The average number of employees by category is as follows:

Employees	31/12/24	31/12/23
Executives	6	6
White collars	36	34
Blue collars	31	33
Total average number	73	73

#### 28 Provisions for risks

No provision was made in 2024.

#### 29 Write-backs/Write-downs

No write-back or write-down was made in 2024.

#### 30 Financial income and expense

"Financial income and expense" at December 31, 2024 ended with a negative €285 thousand (a negative €581 thousand at December 31, 2023). Financial income and expense is made up as follows:

#### Amounts in Euro thousands

	31/12/24	31/12/23	
Exchange rate gains	165	125	
Interest on intercompany loans	95	32	
Interest income on current accounts	95	80	
Total financial income	355	237	
Bank interest expense	(525)	(609)	
Other financial expense	(44)	(48)	
Exchange rate losses	(72)	(160)	
Total financial expense	(640)	(818)	

#### 31 Tax

"Tax" at December 31, 2024 amounted to €642 thousand (€750 thousand at December 31, 2023).

Tax at December 31, 2024 and December 31, 2023 is detailed as follows:

See Note 10 and Note 20 for details on the origin of deferred tax assets and liabilities.

#### Amounts in Euro thousands

	31/12/24	31/12/23
Extra-EU tax	-	-
IRES	(695)	(497)
IRAP	(200)	(192)
Federal and State income tax	(19)	-
Total current tax	(915)	(691)
Deferred tax assets	221	(10)
Deferred tax	9	(91)
Deferred tax from PPA	42	`42
Total deferred tax liabilities	272	(59)
Total tax	(642)	(750)

The reconciliation statement between theoretical and actual rates is shown below.

#### Amounts in Euro thousands

	31/12/24	31/12/23
Profit (loss) for the year before tax	3,414	2,947
A Total taxable	3,414	2,947
B Theoretical tax	953	822

Main reasons that give rise to differences between theoretical and actual tax rates

- ACE benefit	-	(125)
- Tax losses	(209)	-
- Net temporary differences	(42)	-
- Net permanent differences	(59)	53
C Actual tax	642	750
Theoretical tax rate (B/A)	27.90%	27.90%
Actual tax rate (C/A)	18.81%	25.45%

#### 32 Earnings per share

The calculation of basic and diluted earnings per share is based on the following:

Profit (loss) for the year	<b>31/12/2024</b> 2,771,956	<b>31/12/2023</b> 2,196,785
Number of ordinary shares net of treasury shares	10,938,162	10,938,162
Basic earnings per share	0.2534	0.2008

Earnings per share refer to the net result divided by the weighted average number of outstanding shares in the reporting period, net of treasury shares.

#### 33 Related party transactions

Transactions with related parties mainly regard the exchange of goods, provision of services, and the provision and use of financial resources with its subsidiaries, controlling entities and other Group companies and are part of the normal course of business of Group companies and are concluded at normal market conditions. These transactions are governed by special contracts. For the purpose of identifying and presenting related parties, reference has been made to the definition of "related party" under IAS 24. While these are transactions concluded at normal market conditions, the following are the transactions of significant amounts with related parties divided between financial and commercial; for further details, reference is made to the specific sections of these notes.

On June 28, 2024, the Company's Board of Directors approved a transaction to enter into a loan agreement whereby Matica Fintec grants an interest-bearing loan of €2,500,000 (two million five hundred thousand) to Matica Technologies Group SA.. This loan was granted on July 1, 2024.

Below are details of the balances at December 31, 2024 of the controlling entity Matica Fintec S.p.A. and UbiQ software inc. of the above transactions, by counterparty:

#### 34 Atypical and unusual transactions

During the period, the Group did not carry out any atypical or unusual transactions, as set out by the communication itself, which defines atypical and/or unusual transactions as transactions which, by significance/relevance, nature of the counterparties, object of the transaction, transfer pricing method and timing of the event, may give rise to doubts regarding: the accuracy/completeness of the information in the financial statements, conflicts of interest, safeguarding of company assets, and the protection of non-controlling interests.

#### 35 Fees to corporate bodies

In 2024, the following fees were paid:

- Governing body: €776 thousand (in addition to end-of-mandate indemnity (TFM) of €250 thousand, expense reimbursements of €17 thousand, and social security charges of €54 thousand)
- Board of Statutory Auditors: €29 thousand
- Independent Auditors:

- €18 thousand for the statutory audit of the annual separate financial statements of the Parent Company;
- €8 thousand for the statutory audit of the consolidated statements;

#### 36 Government grants

In 2024, the Company benefited from the following government grants:

• Research, development and innovation receivable related to 2021, 2022, and 2023 under Law 160/2019: €128 thousand.
